In partnership with the #General Secretariat for Demography and Family Policy and Gender Equality# of the Ministry of Labour and Social Affairs, Hellenic Post has created a set of stamps based on the four principles of the National Action Plan for Equality for 2021-2025.

They stand alongside other stamps with social themes recently issued by Hellenic Post. This time, they send a message against domestic violence, gender segregation, and job discrimination, and speak to the equal participation of women in a society whose members share equally in assets, rights and obligations in all areas: at work, in politics, in power, in leisure time, in care, and in the family.

The special "National Action Plan for Gender Equality" issue consists of a Souvenir Sheet of 4 Self-Adhesive Personalised Stamps that is available for €3.60 and will be released on Thursday, 22 July.

You can get them from the Hellenic Post e-shop [here](#) and from post offices in the Hellenic Post network.
